DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-69 and 73-92, drawn to control systems for blood pumps, classified in class 600, subclass 16+.

Group II, claim(s) 70-72, drawn to a method of hydrodynamically suspending and controlling an impeller in a general purpose rotary pump, classified in class 415, subclass 7.

Group III, claim(s) 93-96, drawn to an estimation and control system for a general pumping system, classified in class 415, subclasses 13+.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The devices of Groups II and III lack the recitation of specific medical features (as in the claims of Group I), which would enable them to be used with blood pumps. The claims of Groups II and III pertain to general purpose pumps, not those specifically designed or adapted for use in pumping blood.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 3762

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
